EDUCATION

El-mergib University

2018 - 2024

B.sc degree in information technology, computer network department.

SKILLS

- Communication skills.
- Troubleshooting.
- Problem-solving.
- Organization and time management.
- Software & Hardware Maintenance.

LANGUAGES

- Arabic (Native).
- English (good knowledge work).

PROFILE

Skilled Network Engineer with expertise in designing, managing, and securing reliable network systems. Proficient in troubleshooting and optimizing performance to ensure seamless connectivity. Experienced in configuring routers, switches, and firewalls. Dedicated to delivering efficient, innovative solutions.

WORK EXPERIENCE

Research Scientific For Authority Libyan

TECHNICAL SUPPORT *Aug 2024 - Present*

- Diagnosing and resolving hardware, software, and network issues.
- Providing step-by-step technical guidance to users via phone, email, or in-person.
- Installing, configuring, and maintaining systems and applications.
- Monitoring system performance and addressing potential issues proactively.
- Documenting technical solutions, processes, and user support interactions.
- Escalating unresolved issues to higher-level support or specialized teams.
- Managing user accounts, permissions, and access control.
- Assisting in IT equipment setup, upgrades, and troubleshooting.
- Ensuring compliance with security policies and best practices.

COURSES AND CERTIFICATIONS

- CCNA Course.
- CCNP Course.
- Linux essentials by cisco networking academy.
- Fortigate administrator course NSE4.
- 300 hours Network Security Bootcamp by LATI & Fotinet:
  - **Networking & Routing (CCNA, CCNP, MikroTik)**: *Extensive experience in configuring and managing routers, switches, and wireless networks. Proficient in Cisco and MikroTik devices, with advanced skills in routing protocols, network security, and performance optimization.*
  - **Network Security (FortiGate)**: *Expertise in deploying and managing FortiGate firewalls, VPNs, and security policies to protect networks from potential threats. Skilled in network segmentation and advanced threat protection.*
  - **Linux & System Administration**: *Strong knowledge of Linux systems, including server configuration, user management, and network protocols. Experienced in troubleshooting and automating tasks to ensure seamless system performance.*
